

PROJECT HIGHLIGHT

PRECISION EXCAVATION PROJECT IN KEARNY, NJ

Overcoming Access Challenges and Delivering Non-Hazardous Excavation Services for GEI

LOCATION: KEARNY, NJ

PROJECT: EXCAVATION

CONTAMINATION: LOW LEVEL CONSTITUENTS

PROJECT DURATION: 3 WEEKS

PROJECT OVERVIEW

Cascade completed a non-hazardous excavation and T&D project in Kearny, NJ for GEI. Key tasks included removing a 5,000 SF concrete slab, excavating a 260 SF area to depths of 14 to 16 feet, vegetation clearing, and test pitting under the slab.

Despite access obstacles and working in proximity to other contractors not affiliated with the immediate scope, the team maintained high safety standards through frequent H&S discussions and seamless communication with stakeholders.

Completed in 3 weeks, the project delivered exceptional results. Cascade's expertise in non-hazardous excavation yielded efficient execution while meeting all client objectives.

RESULTS

Cascade delivered successful results for the Kearny, NJ excavation project, meeting all client site goals and expectations. Despite a brief shutdown awaiting client sampling results, the project was completed ahead of schedule and adhered to the original budget. The client expressed satisfaction with the outcomes, solidifying Cascade's reputation for reliable and efficient project execution.

EXCELLENCE ON EVERY LEVEL™
