

CORING RIGS & TOOLING

Cascade owns and operates one of the largest fleets in the US. Our fleet includes drill, rotary, coring, probe and utility rigs of all types, rig tenders, support trucks and crew transport vehicles. This list includes Air Rotary top drive and ODEX, Reverse Circulation, Mud Rotary, Sonic, Rock Coring, Direct Push rigs, and vacuum hole clearing trucks. The vehicles are truck, track and balloon tire mounted equipment. We core with all our air rotary and several CME 75 and 85 auger rotary rigs. Any CME auger rig can be set up for coring.

ADVANTAGES OF CORE DRILLING

- Fast with minimal dust generated
- Highly accurate cuts with little noise
- Ability to be performed almost anywhere, including in water and remotely

Cascade's fleet is nationwide and ready to serve you.
