

PROJECT HIGHLIGHT

TARGETED EXCAVATION FOR PETROLEUM IMPACT IN PHILADELPHIA

Rapid One-Week Soil Remediation Completed Safely and On Budget

LOCATION: PHILADELPHIA, PA

PROJECT: PETROLEUM-IMPACTED SOIL EXCAVATION & DISPOSAL

CONTAMINATION: MOTOR OIL, DIESEL FUEL, AND AUTOMOTIVE FLUIDS

PROJECT DURATION: 1 WEEK

PROJECT VALUE: $100,000

PROJECT OVERVIEW

Emerald Transformer in coordination with environmental consultant Woodard & Curran, engaged Cascade to carry out excavation and off-site disposal of petroleum-impacted soil at a site in Philadelphia, PA. The effort centered on addressing contamination from motor oil, diesel fuel, and various automotive fluids. Cascade's responsibilities included exploratory digging to define the extent of contamination, followed by the removal of impacted soil and backfilling with certified clean material. The selection of Cascade was based on a history of effective project delivery and established rapport with the Woodard & Curran team.

RESULTS

The week-long project was completed safely, on schedule, and within budget. All impacted areas were successfully remediated, and site restoration was completed without incident. Cascade met the client's expectations in both execution and outcome, earning positive feedback from both Emerald Transformer and Woodard & Curran.
